

## Somos<sup>®</sup> ProtoGen 18420 A perfect fit

The Somos<sup>®</sup> ProtoGen line was the first resin in stereolithography to demonstrate varied material properties based on machine exposure control. The result: Now you can tailor parts to fit your unique needs.

- ⊕ Excellent durability
- ⊕ Superior strength
- ⊕ Outstanding accuracy

When you need a high-heat and humidity resistant material for your parts, Somos<sup>®</sup> ProtoGen 18420 delivers the performance you need with accurate, easy-to-clean white parts.

### Ideal for a variety of applications

Somos<sup>®</sup> ProtoGen 18420 helps our customers produce various part properties based upon the machine exposure that fit a variety of applications including:

- Electronic Covers
- Consumer Products
- Snap Fit Assembly

## Solutions for many industries

Regardless of what industry you're in, new product developers rely on high-performance prototypes to test their design concepts. As a world leader in stereolithography material innovation, DSM has a Somos® solution for just about any industry. Somos® ProtoGen 18420 helps our customers produce parts that fit their needs. It is perfect for:

Aerospace

Automotive

Consumer Goods

Design

Industrial

Motorsports

## Why Somos® Materials?

DSM is a global stereolithography materials provider committed to helping our clients design whatever their imaginations can create. Through collaborative partnerships and groundbreaking materials innovation, we're pushing the boundaries of possibilities to deliver brighter lives for generations to come.

Since the late 1980s, DSM's Somos® group has earned a global reputation for stereolithography material innovation. Prototypes made from Somos® resins closely replicate the functionality of engineered thermoplastics, but are delivered with increased speed and accuracy.

We are continually advancing the performance benefits of our extensive line of Somos® materials. You'll find a solution for just about any stereolithography application.
