## Proven Drop-In Replacement Laser Sintering Materials

RP Support are able to supply Nylon 12 laser sintering materials in volume including **PA 650**, an easy to process, drop in replacement for other PA 12 sintering powders.

**PA 615-GS** is a highly glass filled Nylon 12 powder providing higher dimensional stability, stiffness and temperature resistance, already proven and in use with a leading formula 1 team. RP Support can also offer customers **PA 860**,

a natural white Nylon 11 formulated for easy processing, producing parts with outstanding mechanical properties without the need to double scan.

## New Laser Sintering Materials from RP Support

**PA 550-ACF**, is our new advanced Nylon 12 material with aluminium and carbon fillers. This material offers excellent machining properties, can be sanded and finished easily in addition to having significant mechanical and thermal properties. Applications for this material include tooling moulds and

final parts for automotive applications that require high quality finishes with good mechanical properties.

For further information or to request samples, please contact us directly.
