

Fully Refurbished Hardware for Sale:

2x Viper™ SLA® Systems 1x D500 Sintering Station

Viper™ SLA® Systems

Both Viper™ SLA® machines have been fully refurbished including the laser sub-system and are fitted with new "fast" PCs running Windows 7 and an upgraded DSP card, supplied with shipping, installation and a 1 year full parts and labour onsite warranty.

D500 Sintering Station

This fully refurbished SLS® system has been upgraded with a high speed digital scanning system and a single high performance embedded PC for faster build times, up to twice as fast over a standard machine, and improved stability and reliability. The system will support the latest format build files.

With all refurbished equipment, RPS also provides:

- assistance in selecting and sourcing the best build material for your requirements
- a guarantee to cover any emergency call outs and to carry out one preventative maintenance visit during the warranty period
- on-going support of any system after the warranty period by offering a range of service plans to suit your operational needs
